But all would not do. The Democrats of our county continued to work diligently and with a will that was alike creditable to their patriotism and principles .-The result is a Democratic majority of 524 -a Democratic gain of 112 since the October election. With a few more speeches from such men as Hamlin and Daugherty our majority would have gone over 600.

We had a few strange speakers to address the Democracy. To them thanks are due, and they have them. Our home speakers are also entitled to credit, for they labored with a seal and argued the issues of the day with a power that told fearfully against the Shoddyites. Unlike our oppenents, they refrained from the use of slang and vituperation, and appealed to the patriotism and good sense of the people sione. Their serwices will long be remembered.

Among these latter we may mention the organ in this city, owned and controlled by an office holder who, no doubt, in his blind ignorance, imagines he is working out a continuance by the exhibition of all the malice, hatred and persecution which the dark side of man's pature is capable of producing. As an evidence of its labors in hat direction, the following extract from a late edition is inserted :

THE MODERATISTS AND VINDIC TIVES.

- 199 · · · · ·

Since it has been definitely accertained that Abraham Lincoln is to be President trariety if not of actual discord seems to have arisen among his friends and adharents, in regard to the future policy of the administration in treating with the Democratic party. So distinct are the tendencies of Mr. Lincoln's votaries, that they might be distinctly designated as the movieratists and the vindictives.

The more influential of their journals, and those, by the way, which embrace all the character, talent and statesmanship of the party, are invariably moderate and disposed to temporize with the Demogratic elements of the opposition. Even those radical spirits of the Philadelphia Press and Washington Chronicle are disposed to butter their words and conciliate the powerful minority that developed itself in solid phalanx on the eighth instant. It is only among some of the local press, in strong administration localities, where numbers have inspired arrogance, and among the who have either not yet received the cae from the ruling powers, or, independently, have essayed for once to follow their own blind and debasing metinets, that the crushing out policy is advocated against the

Democracy,
Among these latter we may mention the organ in this city, owned and controlled by an office holder who, no doubt, in his blind ignorance, imagines he is working out a continuance by the exhibition of ail the malice, hatred and persecution which the dark side of man's nature is capable of producing. As an evidence of its labors in hat direction, the following extract from a late edition is inserted:

"McClellan is mercenary in the extreme, and is likely to hold on to the lat salary of a Major Generalship just as long as he can, notwithstanding he is at the same time engaged in treasonable efforts against the Government and people from whom the salary is received.'

The candid man of any party will not for moment look upon this language as aught else than the vaporings of a spiteful, untruthful and seditious time server. If General McClellan, in being a candidate for the Presidency, was engaged in "transmable efforts against the Government," then no other man could have embraced the constitutional right of becoming a candidate. and all our people, to save themselves from the charge of treason, would be compelled alike to allow the ruling incombent to hold over. TAWBA BRANDY," with reference to its com-position and character, being the same as that produced in past years. A sample taken from ten casks afforded the same results with regard to purify; a slightly increased amount of the principle on which its flavor depends was deermined by comparison with former samples. The indications of analysis show that this Brandy is produced by the same process as most of the imported Brandy.
